### *ABOUT "ARS MEMORATIVA":*

*"ars memorativa", latin for "the art of memory", is a general term used to designate a loosely associated group of mnemonic principles and techniques used to organize memory impressions, improve recall, and assist in the combination and 'invention' of ideas. inspired by this old technique, this album is a tribute to moments, memories, places, feelings and atmospheres. it can be seen as the sequel to the album "remembering" that was released on laverna in late 2009.*
